

Prepared by: Zainab Bibi

Topic: Basic Python Input/Output and Arithmetic Operation

Date: July 4, 2025

Week 1 Report

TASK 1 :

Understand the use of print function in python and print some information using print function and displayed the result in the terminal of vs code.

Program :

```
1  ## Your name , Your Hobby , Age  & Why you want to learn Python.  
2  
3  print(" My Name is  Zainab ")  
4  print("My hobby is Reading books")  
5  print("I want to be a Data Scientist so that's why I am learning Python")  
6
```

Output:

```
My Name is  Zainab  
My hobby is Reading books  
I want to be a Data Scientist so that's why I am learning Python
```

TASK 2 :

Explored the input function in python and arithmetic addition operation on two integers along with getting inputs from the users.

Program :

```
## Ask the user to input two numbers, Print the result of their addition.  
number1=int(input("Enter the first number: "))  
number2=int(input("Enter the second number: "))  
addition=number1+number2  
print("The addition of", number1, "and", number2, "is:", addition)
```

Output:

```
Enter the first number: 56  
Enter the second number: 67  
The addition of 56 and 67 is: 123
